

FERMENTATION HAS NEW LEADERSHIP

Introducing: TransFerm[®] Yield+

TransFerm Yield+ is genetically engineered to outperform conventional yeast products for fuel ethanol production from liquefied grains.

In research trials, TransFerm Yield+ showed substantial benefits in ethanol production facilities:

- Up to 4% yield gains in ethanol
- Reduction in glycerol of 30%
- Reduction in separately purchased GA enzyme

Visit www.lallemantbds.com/transferm_yieldplus/video to learn more about the new head honcho.
